GLOVE PORTFOLIO FOR RETAIL

2021

ABOUT GTS'S HAND PROTECTION DIVISION

- A specialist and leader in the field of hand protection
- Resourced with extensive retail channel experience
- Dedicated retail services warehouse
- Broadest glove portfolio in the industry
- Stock readily available in the UK
- Responsive service
- Bespoke point-of-sale options
- Certification advice
- Award-winning

HOW TO ORDER

Phone: +44 (0)1595 696222

Fax: +44 (0)1595 693 771

Email: sales@gtscentral.co.uk

INTRODUCTION

The range showcases an extensive selection of industry-leading gloves, many from our pioneering manufacturing partner SHOWA, as well as a selection from our SKYTEC and BUDS hand protection brands. We are also pleased to introduce our Benchmark range, which offers durability and function at entry level pricing.

For more information about GTS and our Wholesale range, please visit www.gtscentral.co.uk

QUALITY AND ASSURANCE

All our gloves are tested and certified to various and existing BS EN Standards. The ratings against the standards (shown opposite) are then displayed on the product and packaging. (Packaging only for disposables).

Within industry, this is a mandatory requirement, but not so for gloves to be sold to consumers via retail.

However, by retailing gloves from the GTS portfolio, not only will you be offering your customers a durable and comfortable hand protection product, but you can be assured of its protective qualities too.

The CE mark implies that the gloves comply with the basic requirements laid down by the EEC Directive: Personal Protective Equipment

EN STANDARDS

	<p>EN 374 Protection from Chemicals and Micro-organisms</p> <p>Low chemical resistance or waterproof glove pictogram is to be used for those gloves that do not achieve a breakdown time of at least 30 minutes against three chemicals for the pre-defined list (but which comply with the penetration test).</p>		
	<p>EN 374 Protection from Chemicals and Micro-organisms</p> <p>This standard specifies the capability of gloves to protect the user against chemicals and/or micro-organisms.</p>		
	<p>EN 374 Protection from Chemicals and Micro-organisms</p> <p>Resistance to penetration by micro-organisms. Referred to as acceptable quality level (AQL).</p>		
	<p>EN 388 Mechanical Risks</p> <p>This standard applies to protective gloves giving protection from mechanical risks in respect of physical problems caused by abrasion, blade cut, puncture and tearing. Depending on the version of the standard, if the glove shows this symbol it has achieved a performance index according to the respective attributes below. The scores are displayed under the pictogram from left to right.</p> <table border="0"> <tr> <td> <p>2003 Version</p> <p>A. Resistance to abrasion - Rating 0-4 B. Blade cut resistance - Rating 0-5 C. Tear resistance - Rating 0-4 D. Puncture resistance - Rating 0-4</p> </td> <td> <p>2016 Version</p> <p>A. Resistance to abrasion - Rating 0-4 B. Blade cut resistance - Rating 0-5 C. Tear resistance - Rating 0-4 D. Puncture resistance - Rating 0-4 E. Blade cut resistance (ISO test) - Rating A-F F. Impact resistance (P)</p> </td> </tr> </table>	<p>2003 Version</p> <p>A. RETAIL PRESENTATION

Packaging options for each glove are presented throughout this catalogue. On all pages you will also find a list of products with ordering codes indicating available size ranges per product.

The majority of our range is available with attractive and informative header cards.

Where products have header cards displaying alternative artwork relevant to different target markets, these are shown as follows:

POINT-OF-SALE

A range of point-of-sale options are available.

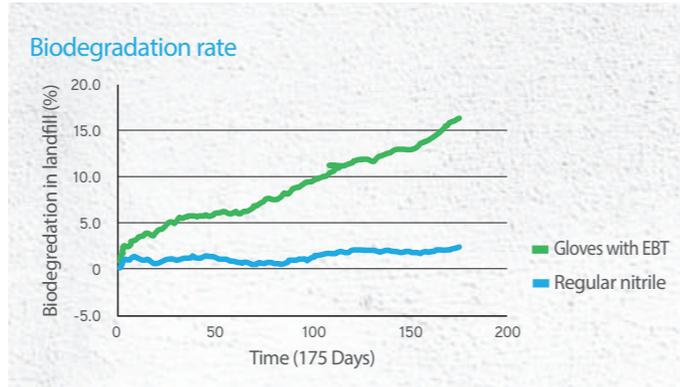

Also available in a 24 peg stand option

Bespoke point-of-sale options can also be considered.
 Please speak with your GTS Retail Account Manager for more information.

ECO BEST TECHNOLOGY® PROTECTION AND PRESERVATION IN ONE

WHAT IT IS

SHOWA's Eco Best Technology® (EBT) is the breakthrough innovation that makes their gloves fully biodegradable, sustainable and the first of their kind.

HOW IT WORKS

When disposed in landfills, micro organisms consume, metabolize and break down EBT materials into three natural compounds - organic soil, methane and carbon dioxide. This creates fertilizer, leaving zero waste behind.

WHERE IT WORKS

EBT requires biologically active landfills for biodegradation. Which means gloves with EBT cannot even begin to biodegrade prior to disposal. These abilities have been validated by independent certified laboratories using ASTM International test methods (ASTM D5511).

WHY IT'S IMPORTANT

Consider the number of disposable gloves used every day in hospitals, offices, schools, warehouses, labs and even our own homes. The numbers are astronomical. With EBT, SHOWA help preserve the planet by accelerating each glove's biodegradation process by up to 100 years*. And every glove makes a difference.

*depending on climate and location of landfill

731 EBT

CHEMICAL RESISTANT GAUNTLET

Flock-lined, nitrile mid-forearm gauntlet provides high levels of protection against common garden chemicals and household cleaning fluids.

NSK24

CHEMICAL RESISTANT DUAL GAUNTLET

A flexible impermeable knit-lined nitrile glove providing grip and protection from an array of solvents, oils and acids.

6110PF

SINGLE-USE GLOVE

A biodegradable single-use nitrile, powder-free glove that's ideal for a wide range of uses around the home and in the garden.

6112PF

SINGLE-USE GLOVE

A nitrile single-use glove with Eco Best Technology®. Provides comfort, dexterity and protection from chemicals.

7502PF

SINGLE-USE GLOVE

A Thin biodegradable and accelerator-free single-use glove. 100% nitrile and powder-free.

7500PF

SINGLE-USE GLOVE

100% biodegradable, single-use glove engineered with Eco Best Technology®.

SHOWA EBT® currently features in three gloves within the retail range. Consumers can be guaranteed of high performing gloves that will stand the test of time. They will only start to biodegrade once placed in landfill.

PRODUCT STORY

The **SHOWA 310** grip glove is iconic within the hand protection industry.

In developing this style, SHOWA created a new category of glove in 1994. In manufacturing terms, this involved the innovative process of flat-dipping the glove with either a high-grip or flat coating of natural rubber latex.

To this day, it is a best-seller around the world and synonymous with reliable grip, durability and flexibility.

WATER RESISTANT

THE FIRST **WATERPROOF** AND **BREATHABLE** GLOVE OF ITS TYPE

WHY THE NEED FOR A BREATHABLE AND WATERPROOF GLOVE?

After long periods of work wearing fully coated gloves, hands naturally generate sweat inside them. This encourages bacteria to multiply and the combined result is an uncomfortable feeling for the user.

HOW IT WORKS

This unique feature is achieved thanks to the glove's innovative nylon/polyurethane liner, inner foam membrane and micro-ventilated polyurethane coating.

The principle is simple: water molecules are too large to penetrate inside the glove, and warm air molecules are small enough to circulate through the liner and coating allowing moisture and perspiration to escape.

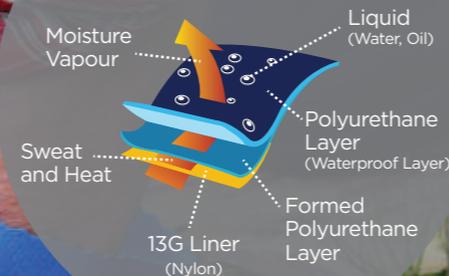

TEMRES

What does it mean?

A name forms based on the amalgamation of two Japanese words.

'TE' (hand) and
'MUREZU' (no humidity)

HOW IT WORKS

SHOWA

A FULLY COATED LATEX GRIP GLOVE THAT PROTECTS COME RAIN OR SHINE

During dry and warm temperatures, wearing gloves can cause hands to sweat. In cold and wet weather, users wear fully coated gloves to keep hands clean, dry and warm. This can often mean swapping between gloves to coincide with the changeable weather conditions.

As a result, users may need **TWO** different types of glove for carrying out the same task, resulting in a double purchase and / or the incorrect glove being worn for the season. To counteract this, SHOWA designed the 306 – a breathable, water repellent, fully coated latex grip glove.

The 306 is revolutionary as it is constructed using a premium combination of full foam aerated latex supplemented with a latex coating on the palm. When wearing the 306, users can expect fantastic grip, dexterity and breathability in dry or wet environments.

DURACOIL IS THE BEST OF BOTH WORLDS

DURACOIL is comprised of 2 words:

1. **DURABLE** = the gloves are designed for maximum comfort, to be worn for extended periods of time
2. **COIL** = the wrapping technique where fibers are coiled over the others in layers

The DURACOIL liner is engineered by tightly wrapping multifilament polyester around a cut resistant fiber, then reinforcing it with High-Performance Polyethylene (HPPE). The technique is very important to user comfort; if not done correctly, the fibers will irritate the skin. This therefore creates a premium lightweight yarn that offers comfort, durability, and increased cut protection.

WHAT IS MULTIFILAMENT YARN?

A high tenacity yarn that consists of many ultra-fine strands or filaments, wound together in an untwisted or unknotted way. These are smoother to touch, ultra-light and used for sturdy products, such as airbags, mooring lines for ships, and the strings of tennis rackets. Typical multifilament examples are Microfiber and Nanofiber.

346

GTS, 8 Lower Blackhill, Lerwick,
Shetland, ZE1 0DG

ABOUT GTS'S HAND PROTECTION DIVISION

- A specialist and leader in the field of hand protection
- Resourced with extensive retail channel experience
- Dedicated retail services warehouse
- Broadest glove portfolio in the industry
- Stock readily available in the UK
- Responsive service
- Bespoke point-of-sale options
- Certification advice
- Award-winning
- High-Grip and Multi-Purpose range made from recycled PET

We are pleased to present a range of gloves incorporating several innovative styles – a range that's positioned specifically to sell efficiently for you.

The Benchmark range was grown from the ground up. Bringing knowledge and experience from the hand protection industry. GTS has brought these technologies to market specifically with gardeners in mind.

A Perfect Fit for Your Category and Your Customer Base.

We never stop believing in doing things better and with this in mind, we would value any questions or feedback that you may have. Please email us at sales@gtscentral.co.uk

- › Cleaning
- › Draining
- › Pond & water feature
- › Watering
- › Mulching
- › Composting
- › Misting

CAT II
CE
4121X

GLOVES PER PACK: 10 pairs
PACKS PER CASE: 12 packs of 10
TOTAL: 120 pairs per case
SIZE: 7/S, 8/M, 9/L

MULTI-PURPOSE

Environment conscious multi-purpose glove made with recycled polyester, nitrile foam palm coated glove designed for precise garden tasks in dry, wet or greasy conditions.

FEATURES

- › Soft and lightweight liner made of 50% recycled polyester equivalent to 1 plastic bottle of 500ml (PET)
- › A flexible and durable nitrile foam coating provides a secure grip and excellent abrasion resistance
- › Close fitting liner for a comfortable wearing experience and elasticated wrist provides a secure fit with maximum tactile sensitivity
- › Gloves are certified by the Global Recycled Standard (GRS)

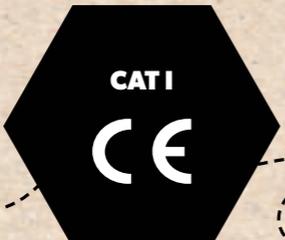

TACTILE

A thin and durable glove for precision tasks in dry conditions

FEATURES

- › Dual layer knitted dipped technology ensures an outstanding fit and gives your hand freedom of movement
- › Polyester liner provides stretch and flexibility whilst increasing abrasion resistance
- › Polyurethane palm coating allows precision tasks and resistance to abrasion / tears
- › Excellent dexterity, flexibility and durability

SUITABLE APPLICATIONS

- › Strimming
- › Feeding
- › Planting
- › Seeding
- › Repairing
- › Painting
- › Sowing

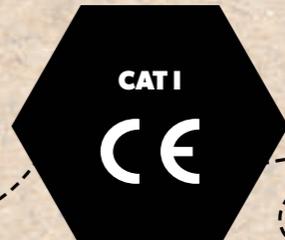

GLOVES PER PACK: 10 pairs
PACKS PER CASE: 12 packs
TOTAL: 120 pairs per case
SIZE: 7/S, 8/M, 9/L

EXPRESSION

A visually attractive glove with outstanding grip. Suitable for a wide variety of general gardening tasks

FEATURES

- › Knitted dipped technology ensures an outstanding fit and gives your hand freedom of movement
- › Polyester liner provides stretch and flexibility whilst increasing abrasion resistance
- › Thin, transparent nitrile palm coating keeps your hands dry and is resistant to abrasion
- › Excellent dexterity, flexibility and durability

SUITABLE APPLICATIONS

- › Strimming

WE ARE ADVOCATES FOR GREEN INITIATIVES!

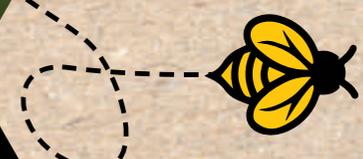

Every pair of Benchmark gloves has a green message to help maintain a healthy garden, attract wildlife and help the environment

HELP BEES IN YOUR GARDEN!

PROVIDE A SOURCE OF WATER!

A small pond will suffice, or even a shallow bird bath with a stone inside to ensure bees can make their way to the water's edge safely.
